

### **Dr. Eloise Chapman '04**

Dr. Eloise Chapman graduated from Stony Brook University School of Medicine (AOA) in 2004 and completed her OB/GYN residency at Brigham & Women's Hospital-Massachusetts General Hospital. She subsequently completed her fellowship in gynecologic oncology at Northwestern Feinberg School of Medicine. She is the Assistant Professor of Obstetrics and Gynecology and Donna Redel Clinical Scholar in the Division of Gynecologic Oncology at Weill Cornell Medicine. She also serves as the Associate Fellowship Director for Weill Cornell/Columbia New York Presbyterian Gyn/Onc Program.

Dr. Chapman's research is both clinical and translational with an emphasis on healthcare disparities. Her research aims to provide a platform to aid in development of clinical trials and interventions to improve gynecologic cancer outcomes.

Her translational projects focus on identifying new therapeutic strategies in immunotherapy for treatment of ovarian cancer and her healthcare disparity work focuses on developing interventions to aid in cervical cancer prevention among underserved populations. Her dedication to the underserved extends internationally, with annual participation in medical and surgical missions in the Caribbean and Africa. Dr. Chapman also participates nationally in the Society for Gynecologic Oncology as Co-Chair of Diversity and Inclusion Committee.
