

Baruch Krauss M.D., Ed.M., F.A.A.P., F.A.C.E.P

Division of Emergency Medicine, Boston Children's Hospital

### **Short Biography**

Dr. Krauss is a pediatrician and emergency physician at Boston Children's Hospital and an Associate Professor of Pediatrics at Harvard Medical School. He is the author of over 90 publications, 2 textbooks, and 4 patents on patient safety monitoring and on the pharmacological and non-pharmacological management of acute pain and anxiety in children.

### **Research Overview**

Baruch Krauss' research focuses on pharmacological and non-pharmacological techniques for relieving acute anxiety and pain in children undergoing diagnostic and therapeutic procedures in the emergency department, and on diagnostic monitoring of exhaled carbon dioxide (capnography) in adults and children.

Baruch Krauss received an MD from State University of New York at Stony Brook School of Medicine and a Masters degree from Harvard Graduate School of Education. He completed residency training in family medicine (University of Washington-Swedish Hospital) and in pediatrics (Boston Children's Hospital), and a fellowship in pediatric emergency medicine (Boston Children's Hospital). He was elected to the American Pediatric Society in 2010.
